

## The faster, easier way to take precise vehicle images

Guided Image Capture provides more flexibility and a new improved service for taking vehicle images.

A cloud-based customizable API solution that uses the latest mask technology to take the best vehicle photos in an easy-to-use way.

### For bodyshops

Take better quality damage photos using a smart phone and without having the vehicle onsite. Save time associated with remote estimating with images delivered within minutes to your workflow, with the option to produce an AI-driven estimate.

### For consumers

Provides consumers with the option to kick start the claim process remotely. A dedicated link is sent via text guiding them to take the best vehicle images using patented mask technology. Images are delivered direct to bodyshops within 3 minutes.

## Benefits at a glance

### Faster appraisals

Images processed and analyzed quickly with all the necessary information provided within hours rather than weeks

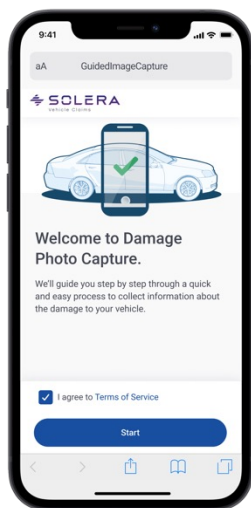

### Greater convenience

No need to transport vehicles to an assessment center or customers to wait for an appraiser

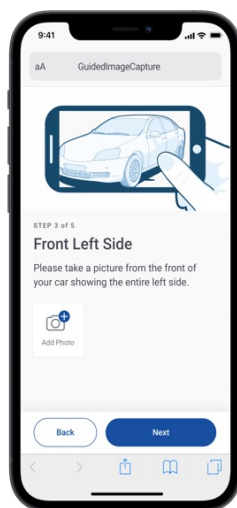

### Easier to use

An improved user experience, consumers are guided to take the right number of quality damage images

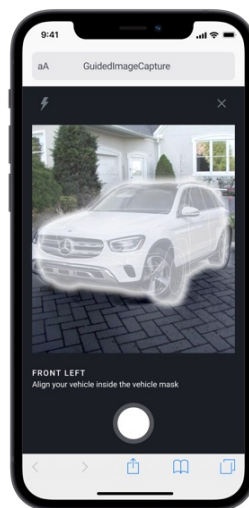

## Here's how it works

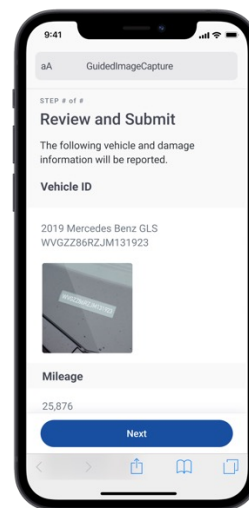

- 1 Link texted to consumer, vehicle found VIN look-up

- 2 Consumer guided to take right number and type of images

- 3 Patented mask technology makes it easier to take precise images

- 4 Report submitted within 3 minutes

Fast 3 minute process to submit

No app download needed

Self-service functionality for consumers

## Key capabilities and new enhancements

-  **New** A new improved user experience
-  A simple, intuitive process triggered via text message
-  Consumers take photos directly on their mobile device or smart phone
-  VIN lookup via OCR (Optical Character Recognition) for reduced time and manual errors
-  **New** Patented technology generates vehicle masks based upon exact body shape for ease of use
-  Ability to create photos, inspection reports or generate AI-driven estimate in minutes

## Key benefits

- » Fast 3-minute process, no app download
- » Easier and more convenient to capture pre-existing damage
- » API-based makes it quick and easy to get set up
- » Greater accuracy with easy-to-use vehicle masks
- » Enables your bodyshop to use precise VI (Visual Intelligence) for estimating
- » Self-serve functionality delivering a better customer experience
